BriefCam
The Video Synopsis Company

Fact Sheet: BriefCam VS Forensics
Browse Hours in Minutes

What Is Video Synopsis?

Video Synopsis is the simultaneous presentation of multiple objects and activities that have occurred at different times.

BriefCam VS Forensics
Standalone Video Synopsis for investigation

BriefCam meets the unfulfilled global need to review video, identify and investigate incidents quickly, and take action. BriefCam's Video Synopsis technology lets users browse hours in minutes, compacting daily and weekly events into a "brief" for rapid review.

BriefCam VS Forensics is an easy-to-use standalone application that enables users to create and review synopsis videos that index back to events of interest in the original video. Synopsis videos and/or their original footage can be exported for investigative purposes.

Using BriefCam VS Forensics results in a significant reduction in the amount of time and personnel it takes to review video, lowering storage and manpower costs.

BriefCam is used by law enforcement, government agencies, educational facilities, municipalities and retail chains – all "getting the brief" with BriefCam.

Benefits
An essential tool for investigation units

- Browse video in minutes, not hours

- Get better evidence, faster

- Stand-alone - no integration needed

- Reduce time and cost of manpower

- No training required

- Utilizes experience, intelligence, intuition

- Easy to install. Easy to use

- Replaces Fast Forward review method

- Enables Total Video Review every day

- An award-winning technology

Review hours of footage in minutes

Hours of footage before BriefCam

After BriefCam: Hours reviewed in minutes

Video Synopsis is the simultaneous presentation of multiple objects and activities that have occurred at different times.
